PROJECTS

Project: Sankara Electronic Remote Vision Information System (SERVIS App)

Responsibilities: Front-end Developer

Technologies: React JS, Material UI, Tailwind CSS

URL: <https://servis.sankaraeye.com/masters/>

Description:

- Dedicated Field workers will visit the individuals in the villages at their houses or at Sankara's Vision Center during Walk-ins or at Sankara Camps to collect the biodata
- Collect data from user registration and basic survey eligible details from the Dynamic question section.
- Presenting vision, eye health, torchlight exam details, and referral info via a digital platform, storing data on a cloud server for analysis. This eliminates manual data collection, paperwork, and calculations.

Project: Deepaa Micro Labs

Responsibilities: Front-end Developer

Technologies: React JS, Material UI, Styled Components

URL: <https://deepaamicrolab.in/>

Description:

- The Deepa labs Project is designed to scan and extract data from medical records of the customers
- Enable doctors to view customer records and update customer details.
- Developed an admin dashboard that shows the details of users and doctor list

Project: Isha Sacred Walks

Responsibilities: Front-end Developer

Technologies: React JS, Chakra UI, Tailwind CSS

URL: <https://isha.sadhguru.org/sacred-walks>

Description:

- Developed a responsive and dynamic web application using React, ensuring seamless user experience across all devices.
- Implemented reusable React components to streamline development and improve code maintainability.
- Optimized application performance through code splitting, lazy loading, and efficient rendering techniques.

Project: Time Check Landing Page

Responsibilities: Front-end Developer

Technologies: React JS, Material UI, React Slider

URL: <https://www.timechecksoftware.com/lp/time-attendance-management-software-solutions/>

Description:

- Built a modern, feature-rich website using React, focusing on modular design and component-based architecture
- Styled the application using CSS modules and libraries like Tailwind CSS, ensuring a polished, user-friendly interface
- Interface development and complete design, build, test and deployment phase.

Project: Nature Resorts**Responsibilities:** Front-end Developer / WordPress Developer**Technologies:** WordPress, HTML, CSS, Custom Theme**URL:** <https://natureresorts.in/>**Description:**

- Developed and customized WordPress websites using themes and plugins to meet client-specific requirements
- Created and modified custom WordPress themes with PHP, HTML, CSS, and JavaScript for unique functionality and design.
- Implemented responsive designs to ensure seamless user experience across desktops, tablets, and mobile devices

Project: Ezbon Global**Responsibilities:** Front-end Developer / WordPress Developer**Technologies:** WordPress, HTML, CSS, Custom Theme**URL:** <https://ezbonglobal.com/>**Description:**

- Developed and customized WordPress websites using themes and plugins to meet client-specific requirements
- Created and modified custom WordPress themes with PHP, HTML, CSS, and JavaScript for unique functionality and design.
- Conducted usability testing and incorporated user feedback to refine the website design and features.
